

American Cities of the Future 2015/16

Winners

FOR THE THIRD CONSECUTIVE RANKING, NEW YORK CITY HAS REIGNED SUPREME AS **fDi**'S AMERICAN CITY OF THE FUTURE, WITH SAN FRANCISCO RISING THROUGH THE RANKS TO TAKE SECOND PLACE AND HOUSTON PLACING THIRD. **CATHY MULLAN** REPORTS

The top 10 of **fDi**'s third biennial ranking of American cities is a wholly North American affair, with all entrants located in Canada or the US. Rebounding somewhat following a turbulent economic period, FDI projects into North America increased 4.55% between 2012 and 2014.

As has been the case in the past two rankings, New York City takes the top spot, further cementing its position as not just a regional FDI powerhouse, but a global one. Beyond New York, however, a shake-up seems to be occurring as to where investors are locating in the region.

San Francisco's golden era

San Francisco, which has finished second in the overall ranking, has seen inward FDI projects increase by 150% between 2010 and 2014. A total of 307 foreign investments were made in the city during this period. Located close to the innovation hub of Silicon Valley, 58.5% of all of San Francisco's inward FDI was in the software and IT sector.

Project numbers in the software publishing subsector, in particular, increased dramatically in San Francisco between 2012 and 2014, rising from 10 projects in 2012 and to 33 in 2014. Investors are encouraged by this cluster in the city, as well as its geographical proximity to a large US market.

Cédric Ravalec, chief executive of France-based Android app company Genymobile, which established an office in the city in 2014, says: "San Francisco is definitely the core of mobile development. The biggest players in the mobile industry are in the [area], as well as our main corporate users."

San Francisco is an innovative place, where

more than 26,000 patents were granted between 2003 and 2013, with 80% growth being recorded between 2010 and 2013. In addition to attracting a high number of FDI projects, the city is home to companies that are also investing further afield. San Francisco was the source of 432 outward FDI projects, almost 65% of which were in the software and IT sector. The city's top three companies for global investment were cloud computing and social enterprise Salesforce, social media behemoth Twitter and online accommodation firm Airbnb.

Houston takes off

Located on the eastern coast of Texas, the US's second most populous state, Houston, has risen up the ranking to third place. Placing second in the Business Friendliness category for major cities, Houston is home to 14 companies on the FT Global 500 list and boasts business start up times of less than six days. There were 48 expansion projects in Houston in the five years to December 2014, showing the city's enduring credibility with investors.

The US ranks highly in the strength of investor protection, corruption perception and economic freedom indices, adding to Houston's allure. An accessible city for investors, its local George Bush International airport provides global connections to 67 locations and it boasts seven ports connecting to shipping routes in the Gulf of Mexico – helping it rank third in the Connectivity category for major cities.

Small but mighty Sunnyvale

Sunnyvale was the only small city (with a population of about 148,000) to appear in **fDi**'s American Cities of the Future 2015/16 overall top 10, and is part of California's Silicon Valley tech hub.

TOP 10 OVERALL AMERICAN CITIES OF THE FUTURE 2015/16

RANK	CITY	STATE	COUNTRY
1	New York City	New York	US
2	San Francisco	California	US
3	Houston	Texas	US
4	Boston	Massachusetts	US
5	Sunnyvale	California	US
6	Toronto	Ontario	Canada
7	Atlanta	Georgia	US
8	Vancouver	British Columbia	Canada
9	Miami	Florida	US
10	Seattle	Washington	US

10	Seattle	Washington	US

TOP 10 OVERALL LATIN AMERICAN CITIES OF THE FUTURE 2015/16

RANK	CITY	STATE	COUNTRY
1	São Paulo	São Paulo	Brazil
2	Mexico City	Federal District	Mexico
3	Santiago	Santiago	Chile
4	Monterrey	Nuevo León	Mexico
5	San José	San José	Costa Rica
6	Panama City	Panama	Panama
7	Bogotá	Cundinamarca	Colombia
8	Querétaro	Querétaro	Mexico
9	Antofagasta	Antofagasta	Chile
10	Heredia	Heredia	Costa Rica

The city is economically healthy, boasting a GDP per capita of nearly \$92,000*, inflation of only 1.98% and a low unemployment rate of 4.6%.

Its headline industries – software and IT, communications and semiconductors – are typical of an innovative Silicon Valley economy, and more than 20,000 patents were registered per 100,000 people between 2003 and 2013 – the highest of any city in the study. Sunnyvale is the source of 93.8 FDI projects per 100,000 people, the majority of which are in the city’s headline industries.

Sunnyvale is home to global internet company Yahoo!, tech start-up Plug and Play, and computer storage and data management company NetApp. These three companies accounted for almost half of the city’s 139 outward FDI projects between 2010 and 2014.

Latin American winners

In the overall Latin American Cities of the Future 2015/16 ranking, São Paulo retained first place. The city is a major FDI hub, attracting more than 500 projects between 2010 and 2014 from companies such as UK-based communications conglomerate WPP, US-based aerospace company Boeing and Germany-based logistics company Deutsche Post.

Antofagasta, a port city in the north of Chile, has risen to ninth position in the overall Latin American ranking. The city has a high GDP per capita (\$52,272*), the third highest level of all Latin American locations studied. It also has a rich mining history, particularly in copper and non-metallic minerals, and the majority of its inward FDI focuses on supporting these industries. Industrial machinery, equipment and tools; chemicals; and coal, oil and gas are the city’s three main sectors, and it also saw a 40% ▶

SOFTWARE AND IT FDI ON THE RISE IN SAN FRANCISCO

OUTWARD FDI PROJECTS FOR SUNNYVALE

Note: Data for period from January 2010 to December 2014. *Other = consumer electronics; industrial machinery, equipment and tools; metals; and pharmaceuticals.

“Montréal’s sector-based approach we developed a few years ago by focusing on industries such as aerospace, information technology and life sciences, is really paying off and making Montréal more attractive to foreign investors”

Denis Coderre, mayor, Montréal

increase in the number of patents registered in the city between 2010 and 2013.

Heredia in central Costa Rica was the only small location to feature in the top 10 table for Latin America. Featured in the February/March edition of *fDi* Magazine as a small city FDI hotspot, Heredia attracts 9.2 inward FDI projects per 100,000 people, the third highest of all Latin American locations analysed. More than 35% of the city’s inward FDI was in the business services sector, followed by 21.43% in software and IT services.

Investors are attracted by the city’s Global Park free-trade zone, UltraPark LAG and Intel FTZ Park, which are just three of the nine free zones and industrial parks the city has to offer. A cost-effective option for investors, Heredia commands low average salaries and rents, and likewise cheap electricity, as well as low costs for the importing and exporting of goods. These factors contributed towards its seventh place ranking in the Cost Effectiveness category for small cities.

While FDI in North America increased between 2012 and 2014, Latin America witnessed a decrease of 9.79% during the same period. Battling unstable economies, as well as civil and political unrest, Latin America’s woes are denting investor confidence. With a high dependency on oil in the region, the plunging prices witnessed in 2014 and 2015 are causing economic uncertainties in many Latin American countries.

The effect of these falling prices, however, will not just be felt in Latin America – cities in Canada’s Alberta, for example, are already feeling the pinch, and the somewhat fledgling shale oil industry in the US needs a per barrel price of \$60 to break even, a figure not yet seen in 2015. The fluctuation in the prices of commodities and energy can hold economies to ransom and the effects on regional FDI remain to be seen. With presidential elections scheduled before 2017 for nearly half of the countries analysed, FDI policies to encourage growth will become increasingly important in locations where domestic energy production is failing. ■

FDI strategy

Atlanta, Georgia

Atlanta ranked first of all 'major' cities in the FDI Strategy category. The Metro Atlanta Chamber employs several strategies to promote Atlanta as an investment destination. These include marketing strategies for recruitment, education and quality-of-life initiatives as well as outbound trade and investment initiatives. The latter, in particular, has helped Atlanta's outward FDI projects increase from 45 in 2013 to 85 in 2014, according to data from greenfield investment monitor **FDi Markets**.

The outbound trade and investment initiative aims to "assist Metro Atlanta companies in finding international buyers, partners and distributors by connecting them to global investment opportunities and coordinating marketing trips", according to the submission from Metro Atlanta Chamber. As part of the city's sector-focused strategies, major growth sectors being targeted in the city include mobile technology, financial technology, clean technology, health information technology and cyber security.

Metro Atlanta Chamber claims that the city has 25% of the worldwide security revenue market, while AT&T Drive Studio in the city supports the mobile technology sector, providing a research facility for digital automotive innovation. Supporting these sector targets, Atlanta also offers a range of incentives for potential investors.

The Quality Jobs Tax Credit grants a credit of between \$2500 and \$5000 per job, providing the company creates at least 50 jobs in a 12-month period, and which pay wages at least 10% higher than the county average. Other incentives include an R&D tax credit and the Intellectual Capital Partnership Programme, which allows investors to "use resources of Georgia's colleges and universities to meet their workforce needs, including access to college-educated employees, recent research and free business advice".

Major contenders

Other contenders in the major classification included New York City and Chicago, which ranked second

and third, respectively. New York City offers a compassionate social initiative, RISE:NYC, which helps companies affected by Hurricane Sandy in 2012 to protect against future storms and the adverse effects of climate change. Chicago, the third most populous city in the US, is looking eastwards to develop its FDI Strategy. In December 2013, its mayor, Rahm Emanuel, signed a memorandum of understanding with China – the first agreement of its kind from a US city. Chicago – now considered the official US gateway city for Beijing, Shanghai, Tianjin, Qingdao, Shenyang, Hangzhou, Wuhan and Chengdu – will benefit from reciprocal missions and business activity, which in 2014 resulted in more than \$1bn in investments. This strategy is supported with an office base in Shanghai.

Austin, Texas

The Texan capital ranked first for FDI Strategy among all large cities. With an investment attraction budget of just below \$1m, the city has developed creative initiatives to promote Austin as an investment destination. Local business organisation members have been appointed as Austin brand ambassadors, promoting the city when they travel internationally, giving an "exact and appropriate representation" of the city to potential investors, according to its submission. The city also works closely with the Austin Areas Translators and Interpreters Association, ensuring that an investor feels at ease and understood when considering the city as an investment destination.

Brampton, Ontario

A suburban city in the Greater Toronto Area, Brampton, which ranked first of all mid-sized cities for FDI Strategy, formulated a four-year development plan between 2011 and 2014 to target "proactive business development and marketing initiatives focused on key sectors and international geographical markets". As part of its 2014 FDI Programme, 18 outbound trade missions were completed to destinations in Brazil, China, Europe and the US. The city now has in place a new four-year international plan, covering 2015 until 2018. A life sciences cluster of

more than 800 businesses has developed in the city, which has seen employment increase in the sector by 50%. In April 2014, Israel-based Taro Pharmaceuticals created 140 jobs in Brampton with the opening of a manufacturing facility.

Richardson, Texas

With a population of just over 100,000 people, Richardson is well equipped to attract investment with a budget of \$1.5m. Helping the city rank first among all small locations for FDI Strategy were several initiatives to attract foreign investors, including the Business Concierge Programme, which recruits members of the Richardson Chamber of Commerce and Metroplex Business Council to provide services such as accounting, legal and real estate services to newly arriving companies to help them become operational. Richardson also engages with other international cities, consulates and chambers of commerce, embarking upon trade missions to promote the city. Consultants for FDI 'lead generation' are also employed to arrange face-to-face meetings with potential investors.

Plattsburgh, New York

Ranking first of all micro locations for FDI Strategy, Plattsburgh (which sits on the north of New York state) looks primarily to Canada to attract investment. The city authorities work closely with border agencies going into Canada, encouraging export activity as well as FDI. Canadian companies are welcomed to 'How to do business in the US' workshops, for companies interested in investing in the US but wishing to stay close to their native country. The Quebec-NY corridor initiative aims to establish a "bi-national economic region", according to the submission from Plattsburgh's North Country Chamber of Commerce. Supported by a cluster-specific web presence – www.flyplattsburgh.com – the city is also focusing on the aerospace cluster, exploiting its close proximity to Montréal where a thriving cluster already exists. The city aims to forge strong links with Canadian companies, and become a "best friend", or an expert location and first choice, for Canadian investors looking to the US. ■

TOP 10 MAJOR AMERICAN CITIES OF THE FUTURE 2015/16 – FDI STRATEGY

RANK	CITY	STATE	COUNTRY
1	Atlanta	Georgia	US
2	New York City	New York	US
3	Chicago	Illinois	US
4	Toronto	Ontario	Canada
5	Montréal	Québec	Canada
6	São Paulo	São Paulo	Brazil
7	Charlotte	North Carolina	US

7	Beloit	Wisconsin	US
8	Itatiaia	Rio de Janeiro	Brazil

Note: List restricted due to shortage of suitable entries.

“Dayton is home to world-class operations like GE, PepsiCo, DuPont, Standard Register, Honeywell, and Assurant. As we continue to shift towards the knowledge economy, we will continue to seek and attract new FDI”

Nan Whaley, mayor, Dayton

“Companies that locate in Oshawa enjoy competitive costs, access to state-of-the-art research facilities and the brightest young minds of the future”

John Henry, mayor, Oshawa

American Cities of the Future 2015/16

METHODOLOGY

To create a shortlist for fDi's American Cities of the Future 2015/16, the fDi Intelligence division of the Financial Times collected data using the specialist online tools fDi Markets and fDi Benchmark. In total, 421 locations were analysed for the study. Data was then collected for these 421 locations under five categories: Economic Potential, Business Friendliness, Human Capital and Lifestyle, Cost Effectiveness and Connectivity.

Locations scored up to a maximum of 10 points for each datapoint, which were weighted by impor-

tance to the FDI decision making process in order to compile both the subcategory rankings as well as the overall 'American Cities of the Future 2015/16' ranking.

In addition, surveys were collected under a sixth category, FDI Strategy. This category is the only qualitative category, and does not feed into the overall result. For this category there were 105 submissions – locations submitted details about their strategy for promoting FDI, which were then scored by fDi's judging panel, which this year included regular

fDi columnist and FDI consultant Daniel Malachuk. In previous rankings, FDI Strategy was included in the overall ranking, however, to separate totally qualitative and quantitative data, we chose to list FDI Strategy as a stand-alone ranking.

Cities in the study were categorised according to population. Those locations with immediate city populations below 100,000 were categorised as 'Micro' locations, of which there were 37. 'Small' locations (208 locations) had immediate city populations between 100,000 and

350,000. 'Mid-sized' locations (of which there were 77) had an immediate city population more than 200,000 and a wider larger urban zone (LUZ) over 750,000, or an immediate city population over 350,000. There were 49 'Large' locations, with immediate city populations more than 500,000 and an LUZ population over 1 million or an LUZ of more than 2 million. 'Major' locations (50) had an immediate city population of more than 750,000 and an LUZ over 2 million, or an LUZ of more than 4 million people. ■

LIST OF DATAPPOINTS

ECONOMIC POTENTIAL

- Population
- Average annual population growth (% 2010 to 2013)
- GDP (at purchasing power parity) (\$000)
- GDP per capita (\$)
- GDP per capita growth (% 2012 to 2014)
- GDP forecast
- Inflation rate
- Unemployment rate
- Outward FDI (2010 to 2014)
- Outward FDI per 100,000 people (2010 to 2014)
- Inward FDI (2010 to 2014)
- Inward FDI per 100,000 people (2010 to 2014)
- Average annual nominal growth in inward FDI (2010 to 2014)
- Average annual growth in FDI (% 2010 to 2014)
- FDI in research and development (R&D), and design, development and testing (DDT) (2010 to 2014)
- FDI in advanced manufacturing (2010 to 2014)
- Number of megaprojects by capital expenditure (more than £100m) including estimates (2010 to 2014)
- Number of megaprojects by capex (more than £100m) per 100,000 people including estimates (2010 to 2014)
- Number of megaprojects by jobs (more than 1000 jobs) including estimates (2010 to 2014)
- Number of megaprojects by jobs (more than 1000 jobs) per 100,000 people including estimates (2010 to 2014)
- Capital expenditure on R&D and DDT projects (\$, 2010 to 2014)
- Number of patents (2003 to 2013)
- Number of patents per 100,000 people (2003 to 2013)

- Number of patents (2003 to 2010)
- Growth in number of patents (% 2003 to 2010 vs 2003 to 2013)
- Nominal growth in number of patents (2003 to 2010 vs 2003 to 2013)
- Global Competitiveness Index (2012 to 2014)

HUMAN CAPITAL AND LIFESTYLE

- Number of students
- Number of international business schools
- Labour force (% of population)
- Tertiary education (between ages of 25 and 64)
- Brain drain
- Literacy rate
- Secondary enrolment rate
- Tertiary enrolment rate
- Third-level students as % of population
- Number of physicians per 1000 people
- Life expectancy
- GDP per capita

COST EFFECTIVENESS

- Average annual salary for an unskilled worker (\$)
- Average annual salary for a semi-skilled worker (\$)
- Average annual salary for a skilled worker (\$)
- Annual rent for prime grade A office space (\$ per m²)
- Annual rent for prime grade A industrial space (\$ per m²)
- Electricity (\$ per kilowatt hour)
- Four-star hotels in city centre location
- Petrol prices (\$ per litre)
- Minimum wage (\$ per hour)
- Cost to export (\$ per container)

- Cost to import (\$ per container)
- Cost of establishing a business (absolute value using gross national income from World Doing Business guide)
- Corporation tax rate
- Common indirect tax
- Country purchasing power parity/exchange rate

CONNECTIVITY

- Upload speed (kilobytes/second)
- Download speed (kb/s)
- Number of airports within 80 kilometres of city
- Distance to nearest international airport (km)
- Number of international destinations served
- Number of ports (medium) within 100km
- Number of ports (large) within 100km
- Number of ports (very large) within 100km
- Number of ports (medium +) within 100km
- Logistics Performance Index 2014
- Networked Readiness Index 2014
- Environmental Performance Index 2014
- Liner Shipping Connectivity Index
- Mobile phone subscribers as a percentage of population (2013)
- Mobile phone subscribers as a percentage of population (2005)
- Percentage point change in mobile phone subscribers (2005 to 2013)
- Quality of overall connectivity

BUSINESS FRIENDLINESS

- Total number of companies in advanced manufacturing sector (2013)

- Total number of companies in hi-tech service sector (2013)
- Total number of companies in knowledge-based sector (2013)
- Proportion of companies in advanced manufacturing sector (2013)
- Proportion of companies in hi-tech service sector (2013)
- Proportion of companies in knowledge-based sector (2013)
- Number of companies in advanced manufacturing sector per 100,000 people
- Number of companies in hi-tech service sector per 100,000 people
- Number of companies in knowledge-based sector per 100,000 people
- Number of jobs created by all inward FDI (2010 to 2014)
- Number of expansion/co-location projects (2010 to 2014)
- Top 1000 World Banks 2013
- Corporation tax rate
- Days taken to start a business
- Firing costs
- Ease of Doing Business rank
- Economic Freedom Index 2014
- Corruption Perception Index 2013
- Strength of Investor Protection Index
- Credit rating (Standard & Poor's)
- FT Global 500 companies
- Number of jobs created by inward FDI (2010)
- Number of jobs created by inward FDI (2014)
- Average annual growth in jobs created by inward FDI (2010 to 2014) (nominal)
- Average annual growth in jobs created by inward FDI (% 2010 to 2014)
- Country risk score
- Number of jobs created by all inward FDI (2010 to 2014) per 100,000 people
